

We are experts in **Business Continuity**

2nd Node Business Continuity Services ensure that your organization is able to support the recovery of key business operations in the event of a disaster. Our Services deliver a robust IT infrastructure enabling a quick resumption of your key business functions. Utilizing the latest technology coupled with our Smart-Hands Support, 2nd Node delivers first class service during a critical time.

2nd Node is able to provide a full service solution to organizations that require office space for recovery, operation support for staff planning, backup systems to restore to, and data center space for system redundancy and/or data replication.
